How do you know that when you seek medical care the practitioners you see are properly educated, licensed, and trained in their specialty?

During National Medical Staff Services Awareness Week, we recognize medical services professionals—important members of the healthcare team that are dedicated to thoroughly investigating and verifying the credentials of healthcare practitioners. These women and men also have expertise in areas such as medical staff organization, accreditation and regulatory compliance, and provider relations.

Don't forget to stop by and say hello to your medical services professionals!
