### Session Description

Has this material been presented or are you scheduled to present this material at any state conference, credentialing software users group, etc. before NAMSS?

- No

#### Preferred Session Length

- 60 minute Concurrent Session

#### Preferred Session Format

- Lecture

## **Session Description**

With the exponential growth of telemedicine many MSPs are finding that they now need extensive knowledge of multi-state licensing. Understanding the complexities of each state's requirements can be challenging. This course will explain the differences between IMLC versus FCVS, Endorsement versus Examination applications and more. You will also learn tips and tricks learned from the trenches of how to avoid common mistakes made on license applications and how to avoid them.

## **Outline**

- 10 minutes - intro to state licensing, types of license applications, terminology
- 15 minutes - overview of FCVS -what it is, what states accept it, and detailed description of what is in the completed profile
- 15 minutes - overview of IMLC - brief history, overview of states in compact currently, how the LOQ works, common misperceptions
- 15 minutes - discussion of common mistakes made on license applications and how to avoid them
- 5- minutes - Q&A

## **Learning Objectives**

1. Upon completion, participants will have a greater understanding of the IMLC and its impact on physician licensing.
2. Upon completion participants will have a greater understanding of the FCVS for physician licensing - what it is, who accepts it and what it contains.
3. Upon completion participants will be able to identify common pitfalls and common mistakes made on state license applications.

## **Tomorrow's MSP® Skillsets**

- Legal
- Risk Management
- Change Management
